Pablo Lamela,
Product Designer

I design digital products that turn complex systems into clear, scalable experiences, creating intuitive interfaces with strong structure and consistency. Working closely with developers, I build and validate solutions in code, ensuring cohesive, scalable results with a strong focus on detail and implementation quality.

Background

Degree in Graphic Design
EASD Ramón Falcón

Technician in Computer Network Admin
IES Muralla Romana

Skills

Language
Spanish (Native), English (Upper-Intermediate, FCE)

Tools
Figma, HTML/CSS, Webflow, Rive, Spline, Jira

Capabilities
Product Design, UX/UI for complex systems, User Flows & Information Architecture, Design Systems, Interaction Design, Component-based Design, Design to Code

Methodologies
Agile (Scrum), User-Centered Design, Design Thinking, Iterative Design

Workflow
AI-assisted workflows, Design to Code, Component-driven design, Design systems in code, Close collaboration with engineering

Industries
B2B & SaaS, AI & Automation, Data Platforms, DevOps, Retail, Augmented Reality

Experience

Product Designer
Diverger (ex-Trileuco)
2024 – Present

Design of B2B and AI-driven products, focusing on complex workflows, data-heavy interfaces, and scalable UI systems. Close collaboration with developers, often working in code to ensure consistency between design and implementation.

Product Designer
Trileuco Solutions
2022 – 2024

Design of complex web applications for DevOps, retail, and data platforms. Creation of scalable design systems and close collaboration with technical teams to align design with implementation.

Web Designer
Visual Publinet
2021 – 2022

Web design in Adobe XD and development using WordPress, Prestashop and CSS.

Graphic Designer
Grupo Inverdama
2019 – 2021

Worked on brand design, web interfaces using Adobe XD and WordPress, and content creation for digital platforms.

Graphic Design Intern
Sanzza
2019

Branding and communication materials for small business clients.

Selected Projects

Diverger Website
Generative AI Web Experience

Corporate site with conversational UI and 3D visuals. Designed layout, motion, and interactions, contributing directly to frontend implementation.

Delta
Retail – Modular Dashboard with AI

Modular dashboard builder with AI-powered widget creation for a leading textile company. Designed custom components and expanded a scalable design system.

iMBranded
Augmented Reality App

AR configurator for placing branded displays in real environments. Designed guided flows and interfaces aligned with real installation workflows.

Yepcode
DevOps Platform

Developer automation platform. Designed product experiences and built the design system, contributing to both UI and implementation.

Denodo
Enterprise Data Platform

Improved UX for an internal data platform, identifying issues and redesigning key workflows for technical users.
